

AMENDMENTS TO THE CLAIMS

1-15. (Cancelled)

16. (Currently amended) An aseptic combination preparation to be mixed at the time of use by opening a partition wall which separates two or more chambers of a container, comprising

a first solution containing a potassium salt in a first chamber and which is divided and accommodated in the two or more separate chambers of one container,

a second solution containing a potassium salt in a second chamber,

wherein ~~each of the solutions has~~ the first solution and the second solution each have the same potassium salt and each have a potassium ion concentration of about 2 to 40 mEq/L.

17. (Currently amended) The aseptic combination preparation according to claim 16, wherein the first solution further contains a sodium salt, a sugar and/or a bicarbonate salt ~~in addition to the potassium salt~~.

18. (Previously presented) The aseptic combination preparation according to claim 16, wherein the container is a plastic container.

19. (Currently amended) An aseptic combination preparation to be mixed at the time of use by opening a partition wall which separates two or more chambers of a container, comprising

a first solution containing at least one medicinal ingredient selected from the group consisting of a sodium salt, a sugar and a potassium salt in a first chamber and which is divided and accommodated in the two or more separate chambers of one container,

a second solution containing at least one medicinal ingredient selected from the group consisting of a sodium salt, a sugar and a potassium salt in a second chamber,

wherein ~~each of the solutions has~~ the first solution and the second solution each has the same medicinal ingredient and each has an osmotic pressure ratio in the range of about 1 to 3

relative to physiological saline.

20. (Previously presented) The aseptic combination preparation according to claim 19, wherein the osmotic pressure ratio is about 1 relative to physiological saline.

21. (Previously presented) The aseptic combination preparation according to claim 19, wherein the container is a plastic container.

22. (Currently amended) An aseptic combination preparation to be mixed at the time of use by opening a partition wall which separates two or more chambers of a container, comprising

a first solution containing a medicinal ingredient in a first chamber and~~which is divided and accommodated in the two or more separate chambers of one container,~~

a second solution containing a medicinal ingredient in a second chamber, so that
wherein the same medicinal ingredient is present in each of the two ~~or more separate~~ chambers.

23. (New) The aseptic combination preparation according to claim 16, wherein the second solution further contains a sodium salt, a sugar and/or a bicarbonate salt.
